## TURN AROUND, DON'T DROWN

**\*Six inches of moving water can make you fall.** If you must walk in water, walk where the water is not moving. Use a stick to check the firmness of the ground in front of you.

**\*Do not drive into flooded areas.** If floodwaters rise around your car, abandon the car and move to higher ground if you can do so safely.

**\*Six inches of water will reach the bottom of most passenger cars causing loss of control and possible stalling.**

**\*A foot of water will float many vehicles.**

**\*Two feet of rushing water can carry away most vehicles including sport utility vehicles and pick-ups.**
